VIGNESH SEKARAN

Software Developer | Backend Development | GenAI

+91 9150449387 | svignesh2902@gmail.com | linkedin | Pune, India

SUMMARY

Experienced software developer specializing in Java and the Spring ecosystem, with practical experience in Kubernetes, Elasticsearch, Cassandra, JUnit, and Maven. Known for delivering scalable, high-quality systems in global teams, while actively exploring and applying Machine Learning, Deep Learning, and Generative AI techniques to address complex technical challenges.

SKILLS

Backend, APIs, Messaging & Streaming

Java, Spring Boot, RESTful APIs & Kafka

Databases & Search

SQL, Cassandra & Elasticsearch

Tools

Docker & Kubernetes

AI / Data Science

Python, Machine Learning, CNN, GenAI & Large Language Models (LLMs)

KEY ACHIEVEMENTS

Amdocs: Moonshot Avishkar 2025

Secure **1st place** for a Carbon-Aware Network Optimizer (CANO) solution,

delivering functional POCs and an MVP that demonstrated sustainable, energy-aware telecom network optimization.

Amdocs GenAI hackathon 2024

Secured **3rd place** in a global Amdocs hackathon by designing and developing a lightweight log analyzer application integrating Elasticsearch with Azure OpenAI APIs.

Research Paper Publications

A hybrid model for the classification of autism spectrum disorder using Mu-rhythm in EEG - 2024

Reproducibility in Brain-Computer Interface Research: A Replication-Based Analysis - 2022

EXPERIENCE

Software Developer

Amdocs — 08/2023 - Present — Pune, India

- Developed scalable, cloud-native microservices using Spring Boot and Kafka, with Cassandra and Elasticsearch, deployed on AWS EKS.
- Designed and built RESTful APIs integrating multiple databases to support business-critical workflows.
- Contributed to effort estimation, system design, and POCs to deliver high- quality, optimal solutions.
- Worked on blue-green deployments, and fixing of CVE vulnerabilities across microservices.
- Applied design patterns, with strong understanding of CI/CD pipelines and TDD/LLD.
- Collaborated closely with cross-functional teams to ensure smooth project execution.
- Regularly delivered end-to-end technical demos, showcasing features and system capabilities while aligning with architects and product teams.
- Actively participated in in-house hackathons, securing podium finishes through innovative and scalable solutions.

Research Intern

Lakehead University — 05/2022 - 08/2022 — Thunder Bay, Canada

- Participated in a Mitacs research program, a national non-profit research organization, contributing to research-driven innovation initiatives.
- Built a POC applying EEG brain signal analysis to cybersecurity-based authentication systems.
- Collected and preprocessed EEG data from 11 participants, creating the dataset entirely from scratch.
- Applied ML and DL models to classify subjects and validate the feasibility of EEG-based authentication.
- Published a research paper based on this work, presenting the findings and validating the proposed EEG-based authentication approach.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Vellore Institute of Technology

CGPA - 8.76

06/2019 - 08/2023 — Chennai, India

12th Standard CBSE – Computer Science

Maharishi Vidya Mandir Senior Secondary School

Percentage - 83.5%

07/2017 - 05/2019 — Chennai, India

LANGUAGES

English, Telugu, Tamil, Hindi
